Scenario: You are searching for a quick bite to eat before you go into work. You are tired of the same fast food places lining the road you take to work. You hear about a new app that randomly generates new places to eat.

Task 1: set up profile. Add email, password, username, allergies. Chose favorites display. Chose your table display.
Add preferences. Add payments.

Task 2: randomly select from categories.

Task 3: look at reviews for randomly selected restaurant. Then chose to accept or decline restaurant.

Changes:
1. add an apply or save changes button to the add payments
2. don't loose loading screen paper for next video
3. better looking welcome screen
4. get rid of find food button have users click magnifying glass

keep:
1. profile settings
2. preference settings
3. review page
